EDUCATION

University of Alberta

Edmonton, Alberta

Bachelor of Science, Specialization in Computer Science

May 2025

- **Awards:** Scholarships for academic excellence: Continuing International and International Country
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Search & Planning in AI, Machine Learning I & II, Software I & II, Product Management

TECHNICAL SKILLS

Frameworks/Libraries: React.js, Node.js, Express.js, Django, Flask, Firebase, Kysely

Languages: Typescript, Java, Python, C, JavaScript, MATLAB, SQL, HTML/CSS

Tools: Git, Figma, Vite, Cybera, Docker, Android Studio, Power BI, Tableau, PostgreSQL, MongoDB

EXPERIENCE

Bleeding Heart Art Space

Sept. 2024 – Dec. 2024

Full-Stack Developer

Edmonton, Alberta

- Engineered and deployed a volunteer management system, implementing both front-end and back-end for core features of the app backed by **PostgreSQL**
- Facilitated **Agile** sprints as **Scrum Master** and delivered biweekly feature releases in collaboration with stakeholders, aligning development with organizational goals and improving internal workflows

Space Exploration Alberta Robotics - University Club

Sept. 2023 – Dec. 2023

Software Developer Student

Edmonton, Alberta

- Actively developed software for a mars-style rover, competing in the Canadian International Rover Challenge (CIRC) and the University Rover Challenge (URC)
- Partly responsible for design, development, and implementation of algorithms and systems as a team

Staples Canada

May 2023 – Aug. 2023

Technology Sales Associate

Edmonton, Alberta

- Assisted customers with troubleshooting, setup, and configuration of technology products and services

PROJECTS

Volunteering Management Platform | Node.js, React, TypeScript, PostgreSQL

Sept. 2024 – Dec. 2024

- Developed a responsive web application for a non-profit organization to streamline volunteer scheduling, and internal communication
- Eliminated **\$500+** in annual recurring subscription costs by replacing a third-party app with a custom platform
- Improved shift scheduling efficiency by **over 55%** (per client feedback) while achieving **82%** accessibility score measured by **Google Lighthouse**

AttendEase Event Management App | Java, XML, Android Studio, OSM API

Jan. 2024 – April 2024

- Generated **4700+** **GitHub project views** with **43 unique cloners**, contributing to its **1st place** finish out of 61 teams
- Implemented comprehensive unit and integration testing using JUnit and Espresso, achieving **98%** code coverage and ensuring robust app functionality across modules
- Cut software bugs up to **50%** by setting up a **CI/CD** pipeline with GitHub Actions, automating builds, tests, and deployments to significantly enhance code reliability and development speeds

Sudoku Puzzle Solver | Python

Oct. 2023 – Dec. 2023

- Implemented a Sudoku puzzle solver using **Backtracking** search to maintain arc-consistency for constraint satisfaction problems (CSP)
- Enhanced efficiency of the Sudoku solver by **around 70%** on average through the utilization of the **Minimum Remaining Value** (MRV) heuristic, directly comparing it to the **First Available** (FA) heuristic to guide the search process
